

Datastream 7i Configuration CBT

You have invested in Datastream 7i to keep operations running at peak efficiency. But to achieve maximum return on your investment, administrators must be fully trained and proficient on how to configure Datastream 7i for optimal performance.

However, it may not always be practical to send your system administrator away for training. So Datastream now offers an effective alternative for training administrators on Datastream 7i—Datastream 7i Configuration Computer Based Training (CBT).

This innovative computer-based training program is delivered through CD-ROM to provide ongoing training on Datastream 7i. The Datastream 7i Configuration CBT is based on field-proven programs that enable users to learn at their own pace and provides automated testing with completion certificates so managers can be confident that their team is fully up to speed on Datastream 7i.

The Total Training Solution

This training solution delivers comprehensive educational coursework on the latest features of Datastream 7i, with the ease and flexibility of computer-based training. Students have access to more than three hours of content, segmented into modules that include Configuration, Organizations, Security and Reports. The Datastream 7i Configuration CBT administers tests on each module to ensure the necessary skills have been mastered. And the built-in dashboard enables users to track their progress throughout the coursework. With the modular format, students can take training in small pieces or all at once, depending on their schedule. For example, students can learn how to set up KPIs and Inboxes, then return to training later to study Screen Designer.

The Datastream 7i Configuration CBT includes:

- > Setting up KPIs & Inboxes
- > Using Screen Designer
- > Configuring Users & Groups
- > Technical Reference Guide (\$1500 value)

Because the training is delivered on CD-ROM, there is no travel or time away from work. Plus, the training modules are always available for refresher courses. The Datastream 7i Configuration CBT delivers an effective and efficient learning regimen. It's what you would expect from Datastream, the world leader in Asset Performance Management. If you would like more information on the Datastream 7i Configuration CBT, contact your Datastream sales representative today.

System Requirements for Datastream 7i Configuration CBT

- > Intel Pentium 500 MHz or higher
- > 128 MB RAM or higher
